Chandra Akash Kiran

Data Science professional skilled in Python, SQL, Pandas, NumPy, and scikit-learn. Experienced in Machine Learning, Generative AI, LLMs, and RAG-based applications. Achieved 97.81% ROC-AUC, 82.54% F1-score, and analyzed 100K+ records.

✉c9a9kiran@gmail.com 8602201879 India

Education

M.TECH — MATS University, Raipur, Chhattisgarh
Computer Science — 2013 - 2016

B.E. — Chhattisgarh Swami Vivekananda University, Bhilai, Chhattisgarh
Computer Science — 2010 - 2013

Experience

GrowthPaay — Indore, India
Data Analyst Intern — January 2023 - July 2023

- Collected and prepocessed 100K+ records using Python, BeautifulSoup, Selenium, REST APIs, Pandas, and NumPy for reports and analysis.
- Wrote SQL queries and automated reports, cutting report time by 40%, and shared EDA findings on trends with stakeholders.

Natrinai Technology Pvt Ltd — Chennai, India
System Engineer — May 2019 - June 2020

- Collaborated Python scripts for data extraction, transformation, validation, and reporting, reducing manual processing work by 50%.
- Automated testing workflows using Python, Selenium, and Robot Framework; analyzed test results, logs, and defect data to support root-cause analysis.

Planning and Statistical Department — Dhamtari, India
Data Operator — October 2014 - March 2016

- Managed, refined, and checked large government datasets in Excel, and achieved Pivot Table reports to support decisions based on statistics.

Projects

Enterprise GPT - AI Knowledge Assistant — September 2026 - October 2026

- Developed a robust AI knowledge assistant for PDF documents, providing context-aware answers via RAG and LLMs, improving information retrieval accuracy by 20%.
- Engineered an end-to-end RAG pipeline integrating PDF extraction, text chunking, Gemini embeddings, ChromaDB vector search, and LangChain agents.
- Deployed a robust Next.js front-end on Vercel and a FastAPI back-end on Render, achieving a 25% reduction in application load times for critical features.

Credit Card Fraud Detection — May 2026 - June 2026

- Established and optimized a machine learning solution to identify fraudulent credit card transactions, addressing class imbalance to enhance fraud detection.
- Preprocessed transaction data, applied SMOTE for class balancing, evaluated Logistic Regression and Random Forest models, and optimized the classification threshold to 0.68.
- Achieved **94.55% precision, 73.24% recall, 82.54% F1-score, and 97.81% ROC-AUC** using Random Forest, with results visualized in an interactive Streamlit dashboard.

Zomato SQL Analytics - Database and Business Intelligence — April 2026

- Designed a relational database with primary and foreign keys to manage customers, restaurants, menu items, orders, payments, deliveries, and reviews.
- Performed advanced SQL analysis using JOINs, aggregations, subqueries, CTEs, and window functions to evaluate revenue, customer behavior, and delivery performance.
- Streamlined an interactive Streamlit dashboard integrated with Neon PostgreSQL to visualize KPIs, business trends, and actionable insights.

chandra-akash-kiran-1767431

Portfolio
Chandra A Kiran

Skills

Programming & Databases
Python, Pandas, NumPy, SQL, Excel

Machine Learning
scikit-learn, Logistic Regression, Random Forest, Classification, SMOTE, Feature Engineering, Model Evaluation

Data Analytics
Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Validation, Excel, Pivot Tables

Generative AI
Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Embeddings, ChromaDB, Vector Search

Visualization
Matplotlib, Plotly, Power BI, Tableau, Streamlit, Dashboards

Data Engineering & APIs
ETL, REST APIs, FastAPI, BeautifulSoup, Selenium

Cloud & Development Tools
AWS S3, Git, GitHub, Supabase, Vercel, Render

Certifications

Data Analytics Training and Certification
February 2023
Masai School

IBM Data Science Professional Certificate
December 2021
IBM
