Education

M.S. in Computer Science: Machine Learning & AI Engineering
Woolf University | Pursuing

M.TECH in Computer Science Engineering
MATS University, Raipur, Chhattisgarh | 2016

B.E. in Computer Science Engineering
CSVTU, Bhilai, Chhattisgarh | 2013

Skills

Data Analytics
Python, SQL, Excel, Power BI

Generative AI
Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain

ML Framework
Pandas, Numpy, Sckitit-Learn, Seaborn, Matplotlib

Cloud & Development Tools
GitHub, Google Colab, VS Code, Jupyter Notebook

Certifications

Data Analytics Training and Certification
Masai School | February 2023

IBM Data Science Professional Certificate
IBM | December 2021

Awards

Python and SQL Badges 2026
Hackerrank

Python Coder Badge
Kaggle

Interests

Hobbies and interests
Travel, Chess, Video games

Summary

Aspiring Data Analyst with hands-on experience in Python, SQL, Excel, Power BI, Pandas, NumPy, with experience analyzing 100K+ records. Skilled in Machine Learning, Generative AI, LLMs, and RAG, achieving 97.81% ROC-AUC and 82.54% F1-score in predictive modeling.

Experience

Data Analyst Trainee April 2026 - Present
AlmaBetter

- Gained hands-on experience in data cleaning, analysis, and visualization using Python, SQL, Excel, Power BI, Pandas, and NumPy, processing and validating 100K+ records.
- Build and deployed 1 end-to-end Generative AI-powered RAG application using LangChain, LLMs, ChromaDB, and FastAPI.

Data Analyst Intern January 2023 - July 2023
GrowthPaay, Indore, India

- Extracted and analyzed 10,000+ records using Python, BeautifulSoup, and Pandas through automated web scraping.
- Performed data cleaning, EDA, and visualization across 10+ datasets to identify trends and deliver actionable business insights.

System Engineer May 2019 - June 2020
Natrinai Technology Pvt Ltd, Chennai, India

- Implemented and maintained 5+ Python-based scripts and applications, automating workflows and improving system reliability.
- Conducted debugging, testing, and API integration across 3+ system modules to optimize performance and ensure smooth operations.

Projects

Enterprise GPT - AI Knowledge Assistant September 2026 - October 2026

- Developed a full-stack RAG-based AI assistant integrating 2 LLM providers (Gemini and OpenAI) using Python, FastAPI, and LangChain for PDF question answering.
- Engineered an end-to-end RAG pipeline with 4 core stages: PDF extraction, text chunking, Gemini embeddings, and ChromaDB semantic search.
- Integrated Supabase authentication, 2 LLM providers, and real-time streaming responses using Next.js; deployed across 2 cloud platforms, Vercel and Render.

Credit Card Fraud Detection May 2026 - June 2026

- Established and optimized 2 machine learning models (Logistic Regression and Random Forest) for credit card fraud detection, addressing class imbalance using SMOTE.
- Preprocessed transaction data, applied SMOTE for class balancing, evaluated Logistic Regression and Random Forest models, and optimized the classification threshold to 0.68.
- Achieved 94.55% precision, 73.24% recall, 82.54% F1-score, and 97.81% ROC-AUC using Random Forest, with results visualized in an interactive Streamlit dashboard.

Zomato SQL Analytics - Database and Business Intelligence April 2026

- Designed and executed a relational database with 7 core entities using primary and foreign keys; applied SQL JOINs, CTEs, subqueries, and window functions to analyze business performance.
- Streamlined an interactive Streamlit dashboard integrated with Neon PostgreSQL, visualizing 3 key areas: revenue trends, customer behavior, and restaurant performance.
